Summary

Full Stack Developer with 5+ years of experience delivering enterprise-grade applications across OutSystems and modern stacks (Spring Boot, React, Next.js). Expert in designing scalable architectures, integrating RESTful APIs, and shipping AI-driven analytics tools in Agile environments — with a growing footprint in AWS cloud solutions.

Work Experience

Seven Seven Global Services

July 2024 – Present

App Developer 2 (Full Stack Developer)

Ortigas, Pasig City, Philippines

- Architected and maintained high-performance full-stack applications using Spring Boot and MariaDB, ensuring seamless integration with React/Next.js frontends.
- Enforced code quality standards through rigorous code reviews, ensuring adherence to architectural best practices and system scalability.
- Developed and optimized RESTful APIs, reducing latency and improving data retrieval speeds for internal enterprise platforms.
- Designed high-level system architectures, optimizing application workflows and technical processes for cross-functional teams.
- Developed AI-driven analytics tools to empower administrative decision-making through automated data processing and visualization.

Seven Seven Global Services

May 2021 – June 2024

App Developer 1 (OutSystems Developer)

Ortigas, Pasig City, Philippines

- Engineered 10+ end-to-end mobile and web applications from inception, leveraging Agile methodologies to accelerate delivery cycles.
- Developed intuitive, responsive User Interfaces for web and mobile, focusing on seamless UX and high user adoption.
- Established robust security protocols, managing Role-Based Access Control (RBAC) and user permissions to safeguard sensitive data.
- Architected and integrated REST/SOAP APIs, including the management of OutSystems database logs to ensure optimal performance.
- Pioneered innovative solutions on the OutSystems platform, utilizing advanced logic and extensibility to meet complex requirements.
- Orchestrated continuous integration and deployment (CI/CD), managing application lifecycles to ensure stable, high-frequency releases.
- Managed environment health by proactively monitoring for broken dependencies and versioning conflicts across the SDLC.
- Designed complex application features in alignment with OutSystems Discovery and 4-Layer Architecture best practices.
- Remediated security vulnerabilities identified through VAPT and provided critical L3 support to resolve production bugs.
- Engineered high-value, reusable components and Forge-style assets to standardize development and reduce future effort by 20%.

Technical Skills

Languages: Java, SQL, JavaScript, HTML5, CSS

Backend/Frontend: Spring Boot, Node.js, REST APIs, React.js, Next.js

Databases/Platforms: MariaDB, OutSystems (Traditional, Reactive, Mobile, Forge)

Tools: AWS, Git, GitHub, Postman, Jira, DBeaver, AI-assisted tools

Certifications & Training

Associate Traditional Web Developer

OutSystems, 2020

Education

Bulacan State University

Bachelor of Science in Computer Engineering

June 2015 – Nov 2020

Malolos City, Bulacan, Philippines
